GROUP WRITING

STEP 4: Outline the paper

A. Refine the thesis.
   Ensure the thesis accurately reflects the research findings and argument.
   Continuously revisit the thesis to ensure that it reflects the research you present.

B. Outline the paper so that group members can see how their information fits with the whole.
   You might create an outline or use the technique of storyboarding in which elements are laid out on single template. This technique enables writers to capture the sense of the whole visually.
