Odesi
Dalhousie University does *not* subscribe to Odesi, and so it is not an appropriate interface to use to *access* data.

However, Odesi has excellent metadata and is a great way to search for variables in the DLI’s collection of Public Use Microdata Files (PUMFs). These can then be accessed in SDA or Nesstar.

**Access Odesi:**
- By going to [Odesi.ca](https://odesi.ca)

**Locate PUMFs:**
- Uncheck "All of Odesi" and check only "Statistics Canada (microdata)"
- Search for relevant keywords.
- Look at the "Series" filter to explore possible relevant surveys.
- Order results by date instead of relevance, and click on "Matching Variables" if available.
Search in Odesi

Search for your desired variable in Odesi

Find data:
unemploy*  Anywhere

Date:
Earliest  Present

Collections:
- All of <odesi>
  - Statistics Canada (Microdata)
  - Statistics Canada (Aggregate data)
  - Public Opinion Polls
  - Other Data

Additional Collections:
- Statistics Canada (Master File)
- CORA
- ICPSR
- Canadian Dataverses
