Datastream is the most comprehensive economic and financial time series database. With access to an unrivalled set of historical financial content, you can investigate the correlations and relationships between global economic indicators and various asset classes.

UNDERSTAND THE PAST
Deep histories allow for correlation and relationship analysis, understanding of economic cycles, and the ability to forecast market conditions.

EXPAND YOUR RANGE
Datastream brings together different asset classes; equities, equity indices, commodities, derivatives, funds, CDS’s, fixed income, interest rates, exchange rates and economics – so you can understand how an indicator in one field can impact all asset classes.

THINK GLOBALLY
The world is getting smaller and interdependencies of markets are more closely tied together. Datastream gives you access to a vast array of markets – including BRIC economies emerging and frontier markets – so you can identify growth opportunities across the globe.

UNIQUE CONTENT
Datastream provides CDS sector indices and valuation aggregates, along with Datastream and Thomson Reuters proprietary indices – so you can access data that is not available anywhere else. Also, we have the market leading data you depend on – like I/B/E/S, Worldscope, MSCI, S&P, Dow Jones, Russell and much more.

UNCOVER ALPHA
The combination of Datastream’s expansive content and sophisticated analytical and charting tools will enable you to spot and take advantage of investment opportunities.

DIVE BELOW THE SURFACE
With Datastream, access
• More than 255 million time series
• Over 13,000 datatypes
• Over 8.5 million instruments and indicators, across all asset classes

THE MARKET-LEADING CONTENT SETS AVAILABLE IN DATASTREAM INCLUDE:

Equities – Equity coverage is sourced directly from exchanges, international suppliers, and published reports. Coverage includes adjusted and unadjusted pricing, volume, market cap, earnings, dividends, financials, fundamentals, ratios, valuations, forecasts, dead series, and more.

Worldscope fundamentals – Company Fundamental data and financial ratios on over 37,000 active quoted companies and over 24,000 inactive ones across 79 markets.

I/B/E/S Estimates – Analyst forecasts for 31 measures covering some 21,000 companies.

I/B/E/S Global Aggregates – Earnings forecasts on a market, region, industry and sector level.

Unit and investment trusts – Extensive pricing and dividend coverage of 210,000 funds, including daily calculated asset values.

Indices – Unrivalled coverage of over 350,000 indices, including equity benchmarks such as MSCI, FTSE and S&P; bond indices such as JPMorgan, Iboxx and Citigroup; government bond indices; proprietary Datastream and Thomson Reuters indices available at both an aggregate and constituent level.

Bonds – Outstanding coverage of bonds, warrants, convertibles, CDS’s, domestic and international issues, including historical price and volume details.

International macroeconomic series – Historical coverage back to the 1950s sourced from central banks and national statistics offices. Includes forecast data for all leading and many developing economies.

Commodities – Coverage includes 77,000 live spot prices plus major indices from JPMorgan, Goldman Sachs; excellent coverage of metals, agriculture series, chemicals, forest products and semiconductors. Energy information from Platts includes 129 categories of assessments and over 65,000 individual series.

Derivatives – Futures covering 54 regulated exchanges across 34 countries with over 175,000 series; options coverage of 2,000 active contracts with over 2.4 million series.
